

Platform Features

A B2B platform for end-to-end cargo delivery management within a 3PL model, connecting suppliers, buyers, freight forwarders, carriers, and transport asset owners

The CRM system automates and streamlines the following processes:

Optimal route selection and simplified document processing

Cargo tracking information support, including email and SMS notifications and real-time location visualization

Streamlined preparation and verification of supporting documents with standardized templates for transport, commercial, regulatory, international, and accounting documentation

Data-driven decision making

Custom-developed system WeTransport

User-friendly interface that optimizes complex and labor-intensive operational processes

A single platform for managing the entire transportation process

The screenshot displays the WeTransport web application interface. At the top, there is a navigation bar with the logo and user information (John Shu). Below the navigation bar, there are tabs for Commercial Offers, Orders, Tracking, and Customs report. The main content area is divided into several sections:

- Client:** IKEA Italy
- Commercial Offers:** DB Cargo AG, Deutsche Bahn, Trenitalia, OBB Rail Cargo Group, Rail Cargo Group, COSCO, UTLC. Com. offer date: 02/07/2026.
- Prior to cross-border:** A table showing freight prices for different stations and container sizes.
- Order:** A section showing order details, including Carrier (Lid Prometheus Holdings) and a table with Owner, Station code, POD station, Containers/Container Size, and POL depot.
- R/w freight price:** A table showing freight prices for different stations and shipment types.

Prior to cross-border		Distributed: 50/50		Use SOC

How to settle an order?

Dear Client,

The WeTransport system offers several options for settling an order, which may vary depending on the requirements of different forwarding companies.

First, you need to select the cross-border route, and then choose the service of a forwarding company.

You can start placing an order by:

- Fiselecting container pick-up from different depots,
- or starting with a railway order.

A progressive discount system based on shipment volume

Supports clients in choosing the most suitable proposal

Considers shipment parameters (volume, cargo types, constraints)

Shows real-time container availability at depot locations

Consolidates offers from various carriers

How to settle an order?

Dear Client,
The WellTransport system offers several options for settling an order, which may vary depending on the requirements of different forwarding companies. First, you need to select the cross-border route, and then choose the service of a forwarding company.

You can start placing an order by:

- Filing container pick-up from different depots,
- or starting with a railway order.

User Guide: "Commercial Offers" Page

1. Getting Started: Selecting Basic Parameters
Begin by filling in the required fields at the top of the page:
1. Period - Select the month in which you plan to ship.
2. Border Crossing - Specify the border crossing point.
3. Carrier - Select the carrier

Containers type: Main FEU range: 1-999

Select station	Shipment type	Enter code	R/w freight price			Security fee price		
POD station		Station code	20 ft DC	20 ft HC	40 ft	20 ft DC	20 ft HC	40 ft

CVZ Bremen	Block train	230600	1800 USD	2350 USD	2850 USD	250 USD	360 USD	480 USD
CVZ Nurnberg	Block train	230600	1950 USD	2450 USD	2950 USD	280 USD	390 USD	500 USD
CVZ Leipzig	Block train	230600	1700 USD	2200 USD	2600 USD	210 USD	310 USD	420 USD
CVZ Duisburg	Block train	230600	1850 USD	2400 USD	2750 USD	270 USD	380 USD	470 USD

Cross-border: Altynkol SOC COC

Reset Submit

The platform eliminates the need for users to:

- ✗ Maintain constant communication with all market participants
- ✗ Manually collect and compare service pricing
- ✗ Conduct time-consuming analysis of commercial offers

The screenshot displays a web interface for rail cargo pricing. At the top, logos for DB Cargo AG (Deutsche Bahn), Trenitalia, and OBB Rail Cargo Group (Rail Cargo Group) are visible. The main content area is titled "Prior to cross-border" and includes a "Distributed: 50/50" label and a "Use SOC" button. A table lists prices for different POL depots and shipment types. A mouse cursor is hovering over the "2450 USD" price for Wuhan with a 20 ft HC shipment type.

POL depot		20 ft HC	40 ft
Chengdu	1650 USD	2200 USD	2700 USD
Lianyungang	1750 USD	2350 USD	2850 USD
Wuhan	1900 USD	2450 USD	2950 USD
Xian	1600 USD	2100 USD	2600 USD
Zhenszhou	1800 USD	2300 USD	2750 USD

Select station	Shipment type	Enter code	R/w fee
POD station		Station code	20 R DC
Malaszewice	Block train	230600	1650 USD

Order-related document management

From the moment a shipment is arranged, the user receives a complete **set of documents of all types related to the order, available in the system and via email**

Centralized document storage

- ▶ Storage of all documents in one place
- ▶ Linking documents to a specific order within the system

Document Management

- ▶ Uploading and attaching user documents
- ▶ Quick access to transport and supporting documentation

Expense Control

- ▶ Recording additional services
- ▶ Linking supporting documents to additional expenses

The screenshot displays a dashboard with three summary boxes at the top: 'Current debt' (USD 0.00 USD), 'Turnover' (USD 557,850,00 USD), and 'Overdue debt' (USD 0.00 USD). To the right are navigation buttons: 'Detailed', 'General', 'Select Visible', 'Reset filters', and 'Expand columns'. Below is a table with columns: 'Sel.', 'N° Order', 'N° Invoice', 'Main service cost', 'Additional costs', 'Serve Subject', and 'Documents'. The table contains six rows of data, each with a checkbox in the 'Sel.' column and a 'Documents' link in the last column.

Sel.	N° Order	N° Invoice	Main service cost	Additional costs	Serve Subject	Documents

Shipment analytics and reports

The system generates comprehensive transportation analytics, including:

Delivery timelines

Shipment volumes

Transportation costs

Order history

Clients gain clear and comprehensive visibility into logistics processes and can analyze transportation efficiency

Features for Partners

User-friendly system experience

The counterparty works within a single digital ecosystem

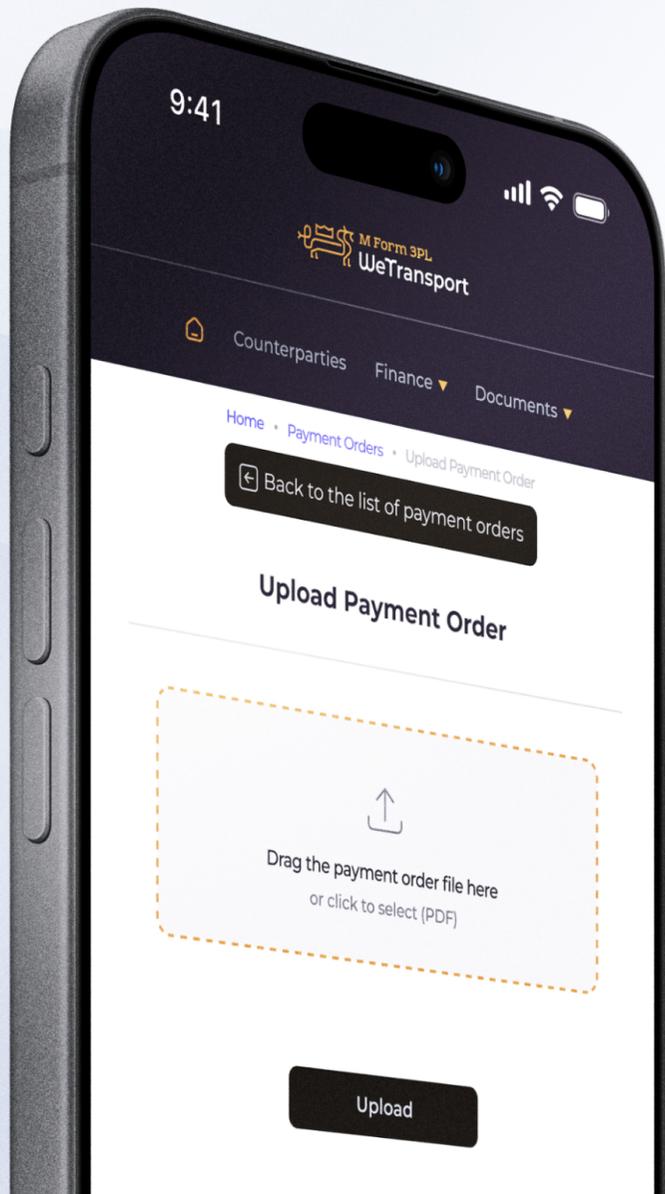

No duplication
of records

No manual data
handling required

No redundant messaging
and document sharing

Automated document upload and processing

The platform supports:

- 1. Import**
Uploading invoices and documents
- 2. Processing**
Automatic data parsing
- 3. Integration**
Linking documents to orders and shipments

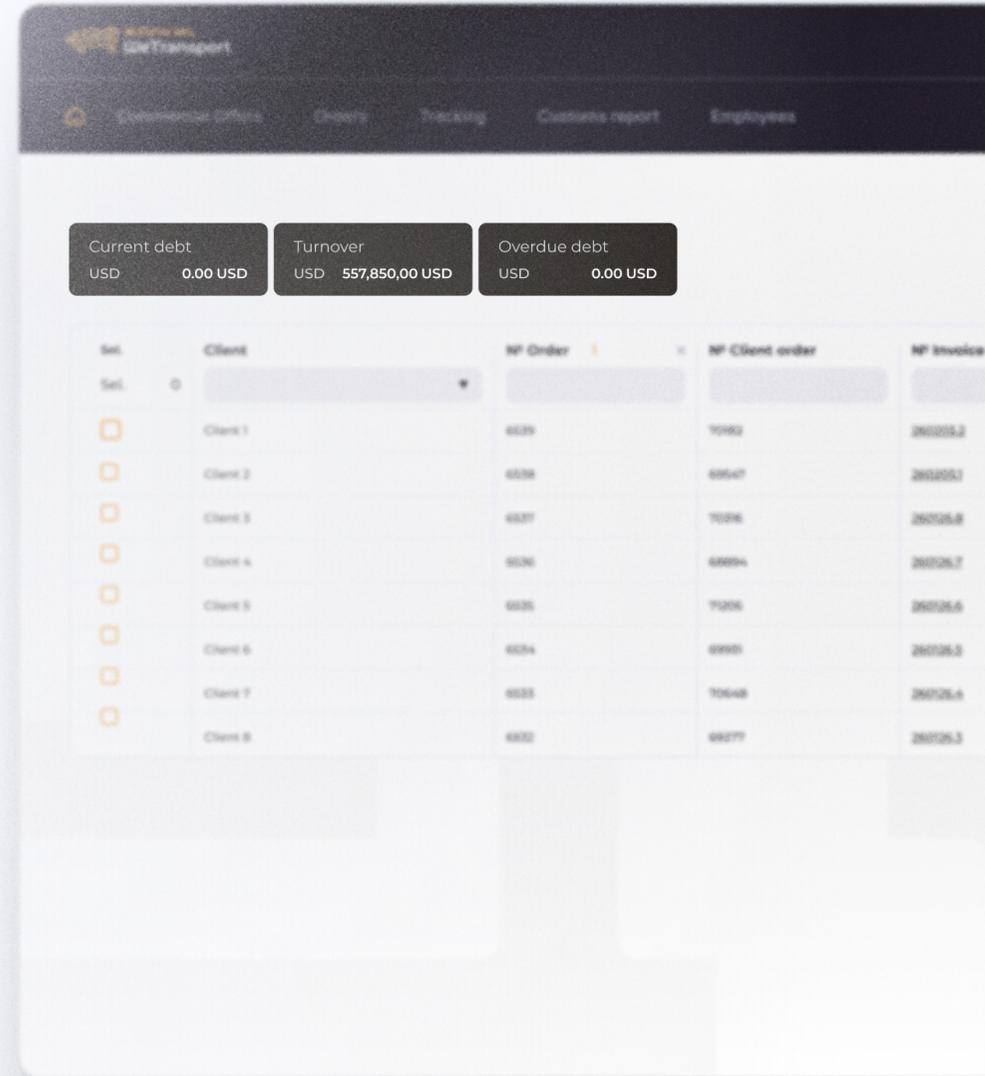

This streamlines operations by reducing manual tasks, lowering error rates, and expediting financial settlements and service completion documentation

Accounts Receivable Reporting and Control

Partners can access reports including:

- ▶ Accounts receivable status
- ▶ Issued invoice history
- ▶ Payment status

Enables partners to monitor financial settlements and plan their operations

Key Advantages of the Platform

Unified access point
to all railway operators

Accelerated document
signing process

Start Signing

Automated document
management and reporting
for partners

Full-cycle document
management for every
order

Option to select a carrier aligned
with actual shipment conditions
